LinkedIn | GitHub

Senior Software Engineer with **9+ years of cumulative experience** in mobile and web engineering. Specialist in **React Native, TypeScript, and Android** with a focus on **Offline-First architecture** and AI-integrated workflows (Cursor, Copilot, MCP). Expert in modernizing legacy Cordova applications into high-performance RN solutions. Proven track record of leading architectural design for complex Permit, Case, and Licensing (PCL) systems and scaling global AgTech platforms.

TECHNICAL SKILLS

AI & Automation:	Cursor, GitHub Copilot, MCP Server, AI Prompt Engineering, AI Forge Hackathon Participant
Mobile & Web:	React Native, Android (Kotlin/Java), React.js, TypeScript, JavaScript (ES6+), Cordova
Architecture:	Offline-First (WatermelonDB/SQLite), Data Sync Engines, Google Maps Integration, Routing
Tools:	Git, Firebase, CI/CD, Jira, Android Studio, Gradle, VS Code, Postman

PROFESSIONAL EXPERIENCE

Granicus Jan 2025 – Present
Senior Software Engineer 4

- Spearheading the high-stakes migration of the **SmartGov (PCL)** app from legacy Cordova to a modern **React Native** architecture.
- Took **complete architectural ownership** of a robust **Offline-First** mobile application utilizing **WatermelonDB (SQLite)**.
- Engineered complex data synchronization logic for seamless bidirectional updates between mobile devices and the cloud portal.
- Integrated advanced **Google Maps** features including specialized routing and location-based permit tracking.
- **AI Innovation:** Participated in the **AI Forge Hackathon**, successfully migrating the *Amanda Cordova app* to an offline-first RN solution using AI-assisted development (Cursor/Copilot).

EPAM Systems Jun 2022 – Dec 2024
Software Engineer 2

- Lead Frontend Developer for Syngenta's "Cropwise Grower" app across APAC, delivering E-commerce and Refer&Earn modules.
- Optimized app performance and reduced technical debt, facilitating massive user base growth and regional market presence.
- Transitioned to the "Connect Retail" app (AMEA region) to implement enterprise-grade loyalty and retail solutions.

Godrej Infotech Ltd May 2021 – Apr 2022
Application Developer

- Modernized internal enterprise apps (Go Turf, MyConnect, Bills Tracker) using React Native and supported legacy Cordova stacks.

Weblusion Infotech Jan 2021 – Apr 2021
Application Developer

- Built ERP Fintech solutions and enhanced the "Taste for Life" E-commerce engine for high-traffic scalability.

ADDITIONAL PROFESSIONAL EXPERIENCE

MarvyTech Jan 2020 – Dec 2020
Founder

- Founded digital agency delivering MVP products for SMEs; specialized in Kotlin and React Native product strategy.

Techstroock Jun 2019 – Oct 2019
Android Developer

- Engineered location-based native Android apps similar to Uber; integrated RN components into native environments.

Freelance Development Jan 2016 – May 2019
Full Stack Developer

- Developed and sold **MusicX** (trending Play Store music app) within 8 months. Delivered 10+ web/mobile client projects.

EDUCATION

Shree L. R. Tiwari College of Engineering 2013 – 2019
Bachelor of Computer Engineering
